

TUNING THE GUITAR

There are 3 methods for tuning your guitar.

1. Use a **tuner** which will tell you if each string is in tune.

2. **Develop your ear** to hear if each string is in tune and compare each note to a piano, tuning pipes or go to <http://www.howtotuneaguitar.org> for the guitar notes.

3. Take the 6th string as being in tune and **tune the rest of the strings to the 6th string.**
